

ServiceStream

November 2024

Dear Neighbour,

Update: South West Pipeline Project – November 2024 edition

Comdain Infrastructure (part of the Service Stream Group), on behalf of Seqwater, has been constructing the South West Pipeline (SWP), which will connect Beaudesert to the SEQ Water Grid.

In October, the project commenced the final commissioning phase of Proof of Performance Testing. The temporary bridge at Cedar Grove Weir has also been demobilised and the majority of remediation works have been completed.

In November, Service Stream will handover the completed asset to Seqwater and demobilise from site. The project team thank the community for their patience and understanding during the construction works over the past years.

Minor works will continue on final commissioning, including some operational releases of water from the Beaudesert Water Treatment Plant into stormwater drainage at Helen Street.

While this will be the final update provided on the project, you can continue to reach out to the Seqwater project team following final handover via ProjectInfo@seqwater.com.au or 07 3432 7000 with any questions or concerns.

To learn more about the upcoming November work please contact the project team on:

Phone: **1800 271 095**

Email: qldfeedback@servicestream.com.au

Thank you for your understanding during this important work.

Yours sincerely,

DB

Damian Barlow

Service Stream Project Director – South West Pipeline Project
